

Roll Bottom Fold / Feed Table

- ✓ Ergonomic operation to reduce operator strain and fatigue
- ✓ Designed for loading from overhead sling systems
- ✓ Heavy duty rugged construction
- ✓ Low maintenance

The Speed Check Roll Bottom Fold / Feed Table is designed to reduce operating costs and increase productivity by reducing operator back strain and fatigue. The table is lined with a blue "Pack Cloth" polyester fabric roll-up surface, which when loaded may be raised or lowered with a standard hand control or optional foot control. A heavy-duty electric motor brings the work to within easy reach of the operator. When emptied, the fabric is lowered using the same controls to accept the next load of work.

Roll Bottom Fold / Feed Table
